

Logistics Management 2011

Bamberg, September 28-30, 2011

Special activities for junior researchers

- The program for junior researchers is developed in collaboration with Prof. Dr. Inga-Lena Darkow (European Business School, Wiesbaden), the person in charge of next-generation cultivation at WK Logistics in VHB.
- As part of the 2011 logistics management conference, the program is aimed at current ...
 - ... post-doctoral students and ...
 - ... Doctoral students...

... in logistics, supply chain management, procurement, production management, etc.

- The current plan is to offer two 90-minute workshops.

Workshop 1: Publish or Perish – Developing a successful publication strategy

The workshop will most likely include presentations on suitable research methods and the necessary academic rigor. It will also discuss frequently made mistakes and offer a forum for speaking with "publication-experienced" experts.

Workshop 2: Career tracks with a doctorate

The second workshop is to serve as an interactive plenary session. We will address the following questions in particular:

- What opportunities/advantages does a doctoral degree offer in the industry?
- What opportunities/advantages does a doctoral degree offer in consulting?
- Is it possible to plan an academic career?
- Post-doc vs. junior professorship

- There will be a "junior table" for junior researchers at lunch and the evening events.
- "Research focuses" bulletin board
 - We offer junior researchers the opportunity to post a profile listing their research focuses and ideas for collaboration on a bulletin board. This is a great way to make interesting and fruitful contacts.

- Please feel free to contact us if you have any questions or concerns.

Please contact Dipl.-Kffr. Sabine Haas (E-Mail: sabine.haas@uni-bamberg.de).
